

Helpful Questions to support Early Help Work.

The questions below offer practitioners a framework to explore with parents, carers, children and the wider multiagency Team Around the Family (TAF) 'What people are concerned about?' The questions do need to be worded in a way that allows all participants in the meeting to engage in the meeting. These questions are designed to help practitioners explore professional /family concern and support identification of emerging needs. This framework of questions will support the practitioner in completing the Early Help Assessment if it is appropriate and review the TAF and Child's Plan.
